SEC V.I.O.

## Executive Summary

The content of this Whitepaper discussed the Smilecoin token, The SEC Platform and everything investors or partners will want to know. Note that this paper is version 1.0 and can be updated in the future. For any future changes, community members will be contacted, and updates will be notifiable. The SEC Platform is more than just a platform, it's a whole different world.

SEC V1.0

## Introduction

Welcome to the official Smilecoin (SEC) whitepaper. Here we will give an overview of our project and future plans to help any investors understand our offerings better. December 2020 Smilecoin started selling SEC tokens for private investors. There will only ever be 29 000 000 Smilecoin in existence every. It is to note that Smilecoins are technically Ethereum ERC20 Tokens but for practical purposes and for the understanding of this document, we will just refer to them as Smilecoins. The Smilecoin platform provides value and opportunity in the form of staking. Users can stake their Smilecoins on the Smilecoin platform, staking time is only 60 days and promises 2% growth every day. After 60 days, users funds will be withdrawn from the Smilecoin platform at the prescribed rate and put on the exchange to sell at the price at that time.

## Smilecoin Platform (SEC Platform)

The SEC Platform is a streamlined cryptocurrency payment system with its own mobile wallet application based on an ERC-20 (smart contract) platform, a payment gateway named SEC, and a gateway. market. The SEC protocol uses a new architecture of smart contracts, which helps to reverse cryptocurrency transaction mechanisms. Instead of customers depositing or pushing money, businesses can withdraw money from clients' wallets based on previously approved terms. This has allowed us to develop a new payment option on the Blockchain (Recurring Payments, Billing, Time Payments, and Dynamic Prices) that was previously not possible. It is also stated in the introduction that users will be rewarded during the staking period and make back on their initial investment. This is seen as an alternative to an airdrop function.

Our Fiat settlement layer will eliminate the risk of volatility associated with cryptocurrencies and ensure liquidity, by locking the SEC token at the time of transaction. Using this layer businesses and individuals will receive their funds in the form of Fiat directly into their bank accounts without the hassle of liquidation related to electronic exchanges. This function is optional by the way. Additional arrangements can be made via USD stable coins.

## Our History

The foundation of the company is backed by more than 10 years of experience by its founder in the global betting and e-sport markets. Fast forward to the present, Smilecoin uses the advancement in the data economy and Fintech development to provide sustainable returns to its investors.

Smilecoin is THE FIRST decentralized casino platform established in the UK that provides a social network solution that connects all investors with absolute ease and safety with a simple yet effective interface and team. 24/7 customer-friendly support and lowest transaction fees. Smilecoin is built by highly specialized teams with experience working in banking systems and building systems for Finance, Social solutions and E-commerce, Payment and Development Systems Software.

## Benefits

Smilecoin is built on the basis of high unity to bring absolute benefits to customers. Some outstanding features of Smilecoin include:

- Segregation of clients' fund:** Client's money is held in individual accounts and managed professionally
- Regulated liquidity provider:** Smilecoin partner 3 top tier banks and 5 non-bank liquidity providers
- Negative balance protection:** overtrade protection against market volatility
- Secure encryption:** All transactions use SSL security protocol to keep all client information private

Smilecoin ecosystem is built by the world's leading experts in finance and blockchain technology. Their birth system is built on 4 specific areas including Cryptocurrency, Casino, Brokers and Financial Institution. We can describe connectivity and cohesion in Smilecoin ecosystem as a seamless flow of financial markets.

Besides that, Smilecoin is going to build an IoT system (Internet of things) a system of interrelated computing devices, mechanical and digital machines provided with unique identifiers (UIDs), and the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction. internet of things (IoT) plays an important role to strike a balance between 'mechanical' and 'natural' behavior in trading decisions to deliver better results.

## Token

The official Smilecoin Token (SEC) is the main asset running on our platform. The SEC Token is a complete solution that enables the use of cryptocurrencies in everyday life. We allow crypto holders to transact and liquidate with partners and this is the token that is being staked over the 60 day period.

The following is the token information:

Total reserves: 29,000,000 Tokens

Token Name: Smilecoin

Token Symbol: SEC

Token Type: ERC-20

Decimals: 18

Token Contract on Ethereum mainnet:

<https://etherscan.io/token/0x75d669c53142302c8826d16b5689bffd50a7e18>
